RE: FDCS Training

Training on the Field Data Collection System (FDCS) will be provided at the District Training Facilities. Target audiences for the FDCS training courses are:

- FDCS User – GDOT field testing technicians; consultant testing technicians, and asphalt plant QC technicians.
- FDCS Admin. – Super Users who can verify records submitted, set up FDCS login accounts, and help provide frontline user support. This includes District Branch Lab managers, TMOS, Asst. TMOS, and Technical Services Managers.
- FDCS Browser – People who want to see project test results, primarily GDOT Construction Division personnel, and contract auditors. District Training Specialists are encouraged to attend this course in case there is additional need in their District.

This training will benefit both the department and the producers to ensure the information is collected and uploaded correctly. Below are the dates and times for the training.
